

Marshall Williams

marshall.williams184@gmail.com | 512-595-9231 | [LinkedIn](#) | [Portfolio](#) | San Marcos, TX (Open to Relocating)

SKILLS

Data Reporting: Data Analysis, Excel, Power BI, Dashboard Design, Machine Learning, Data Pipelines, Salesforce

Business: Team leadership, training and mentoring, cross-functional collaboration, stakeholder communication, project coordination, customer service, presentations

Technical: Python, Java, SQL, Scikit-learn, Pandas, Git, Agile, JIRA, AWS, Docker, Generative AI/Claude Code

EDUCATION

Bachelor of Computer Science and History, Texas State University | 3.90 GPA | Graduated August 1st, 2026

Dean's List (every semester); Phi Beta Kappa (inducted 2026);

Texas State Achievement Scholarship (70% tuition); worked my way through school at H-E-B

Capstone Research: French Economic Strategy & The Ruhr Crisis of 1923 | Economic Research and Argument

- Conducted in-depth macroeconomic and historical research analyzing how French reparations policy, currency strategy, and industrial resource competition with Germany drove the 1923 Ruhr Crisis, synthesizing primary and secondary sources into a documented, evidence-based argument.

WORK EXPERIENCE

Intern | Planview Strategic Portfolio Management Systems **May 2026 – Aug 2026**

- Escalation Risk Forecasting System | Data & Trend Analysis, Excel, Python, Salesforce, Machine Learning

- Identified the business opportunity to reduce costly case escalations, proposed it to stakeholders, and owned the project from concept through delivery, building a forecasting model to predict risk trends ahead of time.
- Conducted testing of machine learning models and 40+ feature variables; resolved data leakage issues to ensure a trusted final product capable of training on 100,000+ historical Salesforce cases.
- Delivered and presented an automated system hosted in Azure cloud producing daily open cases score reports for over 20 members of leadership, improving case prioritization and reducing service level agreement violations.

Service Team Lead | H-E-B **Feb 2020 – Present**

- Serve as the primary point of contact for up to 25 team members at a time, assigning registers and breaks, delegating tasks in real time and resolving technical and customer issues as they come up.
- Trained 25+ new and existing team members across multiple roles during a 3-month hiring season.
- Worked with partners and other team leads to bring department items-per-minute KPI to 98%.
- Collaborated with leaders to reduce customer wait time KPI to under 10% by analyzing business trends using system-tracked average cart-size data to guide checkout lane assignment decisions.

Intern Software Developer | Accio Data Software **Dec 2022 – Aug 2023**

- Learned LaTeX documentation, Java development practices, Selenium test automation, Relational Databases, Agile development, and Git version control through mentorship from software developers.

PROJECTS

Riot Games Match Data Analytics Platform | Trend & Statistical Analysis, SQL, Python, Generative AI

- Developed SQL aggregation views and a reporting dashboard to surface win-rate and performance trends, translating raw match data into decision-ready insights for evaluating competitive strategy.
- Built an automated ETL pipeline that pulls, cleans, and normalizes League of Legends match data from a public API into a relational Postgres database, processing thousands of match records.

NYC Taxi Data Analytics & Prediction Platform | Data & Trend Analysis, Python, SQL, AWS, Generative AI

- Analyzed millions of NYC taxi records to identify demand and fare trends across time and location, building a predictive model to forecast trip patterns and surface actionable insights for planning purposes.
- Built and automated a cloud data pipeline (AWS) to reliably process large-scale transactional data, ensuring clean, trustworthy inputs for downstream trend and forecasting analysis.
