marshall.williams184@gmail.com | 512-595-9231 | [LinkedIn](#) | Open to Relocating

SKILLS

Data: Machine Learning, Data Analysis, Data Pipelines, Dashboard Design, PBIX, Excel, Salesforce

Business: Team leadership, Training and Mentoring, Stakeholder Communication, Customer Service

Technical: Python, Java, SQL, Scikit-learn, Pandas, AWS Cloud, Git, Agile, JIRA, Generative AI/Claude Code

EDUCATION

Bachelor of Computer Science and History, Texas State University | 3.90 GPA | Graduated August 1st, 2026

Dean's List (every semester); Phi Beta Kappa (inducted 2026); Texas State Achievement Scholarship

WORK EXPERIENCE

Intern / Planview Strategic Portfolio Management Systems May 2026 – Aug 2026

- **Predictive Analytics Pipeline for Escalation Risk** | Machine Learning, Python, Salesforce, ETL, Azure Server

- Identified the business opportunity to reduce costly case escalations, proposed it to stakeholders, and owned the project from concept through delivery, gathering requirements directly from Escalation Managers.
- Conducted testing of machine learning models and 40+ feature variables; resolved data leakage issues to ensure a trusted final product capable of training on 100,000+ historical Salesforce cases using SOQL.
- Delivered an automated ETL pipeline hosted in Azure cloud producing daily open cases score reports for over 15 members of leadership, improving case prioritization and reducing SLA violations.

Service Team Lead | H-E-B Feb 2020 – Present

- Promoted to Service Team Lead in 2023 after 3+ years as a Cashier, recognized for reliability and performance.
- Serve as the primary point of contact for up to 25 team members at a time, assigning registers and breaks, delegating tasks in real time and resolving technical and customer issues as they come up.
- Trained 25+ new and existing team members across multiple roles during a 3-month hiring season.
- Mentored team members on KPIs such as items per minute, produce scan percentage, and return to order.
- Collaborated with leaders to reduce 'customers waiting over 3 minutes' to under 10% by using system-tracked average cart-size data to guide checkout lane assignment decisions.

Intern Software Developer | Accio Data Software Dec 2022 – Aug 2023

- Learned Java development practices, Selenium test automation, Relational Databases, LaTeX Documentation, Agile development, and Git version control through mentorship from Software Developers.

PROJECTS

Riot Games Match Data Analytics Platform | Python, JavaScript, SQL, CI/CD, ETL, Claude/Gemini

- Built an automated ETL pipeline that pulls, cleans, and normalizes League of Legends match data from a public API into a relational Postgres database, processing thousands of match records.
- Designed SQL aggregation views to surface win-rate, meta-trend, and player-performance insights across multiple report views, delivered through a deployed full-stack dashboard with automated CI/CD.

NYC Taxi Data Analytics & Prediction Platform | AWS, Python, SQL, Docker, Terraform, Gemini

- Developed a serverless AWS pipeline (S3, Fargate, Athena), automating deployment with Terraform and GitHub Actions CI/CD to process millions of NYC public taxi records into clean insights.
- Trained an AWS SageMaker model to predict trip durations and pickup locations, then used Jupyter and SQL exploration to find demand and fare trends across millions of trip records.
